

New Pedicure Clients 2021

Appointment Policy with Lori Halloway

1. Due to increased demand and limited availability. I can only take clients that I can also film for my YouTube channel. If you don't have excessive issues another staff member can provide the service.

2. Full payment of service is due at the time of booking. The payment is non refundable. We understand emergencies happen from time to time. However, we require a 2 week notice to reschedule your appointment, one time. Missed appointments must pay in full.

I love being able to provide pedicure services and solutions for people who have difficult toenail situations. However, some issues are outside my cosmetic realm of practice. Before you make an appointment, **please read through the list** to ensure that I can complete the service when you arrive. If you come and have an issue I am unable to work on, I will not be able perform the service, and you will lose your payment.

Do You have:

1. An active case of athlete's feet?
2. Can you see tiny blister-like circles when your feet are wet?
3. Warts anywhere on the foot or leg?
4. Open sores on the foot or leg?
5. Active infection or puss in the toenails?

If there is a condition that would warrant the need for glove use, I will not be able to do the service. Patron protection and disease control are essential in the nail industry. I follow all state board rules and regulations. And follow all safety and disinfection processes to ensure our clientele's safety.

- Masks still must be worn covering your mouth and nose if you are not vaccinated.
- No additional guests in the pedicure room during the service.

The receptionist will ask you these questions, and if you arrive with any of the conditions, I will not be able to perform the service.

1. You can treat the athlete's feet with the over-the-counter product, from my website, for two weeks before you come to see me and ensure it is gone. <https://bit.ly/3uYzn1w>
2. Please see your doctor and have the wart removed or frozen. I cannot give you a pedicure until the wart is gone.
3. Wait until any wound is healed.
4. See your doctor for treatment options. I can see you when there is no longer anybody fluid present.

Do you have

1. Gel polish on your toenails?

2. I do not have the time built into my service time to remove gel polish from your nails.

3. Please remove the gel polish at home.

4. I do not have the time built into my service times to apply gel polish to the toenails.

Do you have?

1. Pincer nails

2. Ingrown toenails

3. Impacted toenails

4. Toenail fungus

5. Thick calluses

I can help you :)

The receptionist will ask to ensure I have enough time to work on these situations and or apply the required products to help reverse the problem.

Calluses are in some regions of the foot. If you have a layer of thick buildup on the entire surface of your foot, there is a good chance you have a type of athlete's foot that creates this. I cannot try to remove this layer with physical manipulation. You need to purchase the product from my website to use at home for at least two weeks before coming to see me. <https://bit.ly/3uYzn1w>. You can send me a picture of the bottom of your foot if you are unsure. Send photo inquiry to lori@themetulousmanicurist.com.

If you would like to have a customized or specialized pedicure service after reviewing these guidelines please call the salon at **734-944-9363**. The receptionist will take the payment and schedule you an appointment. I look forward to meeting you.

Best Wishes,
Lori Hallway
